

## Safety recognition programs that are a vital part of your total rewards strategy.

SafetyLink helps you recognize employees for safety compliance. It delivers safety data to executives and safety managers, so they can identify the employees who are saving the company money and the programs that are producing a return on investment.

### Safety Savings/Loss Report

Start Date  End Date

## Watch your safety programs produce realtime results.

- Get a realtime snapshot of your firm's net savings or net loss position based on claims and state guidelines versus benchmarks of your choosing
- Track safety compliance from the corporate level to the individual level to highlight, measure, reward and report on behavioral risk.
- Search records by keyword to identify top safety performers who demonstrate the skills, abilities, motivations and character that promotes safety.
- Make safety management an explicit performance expectation by clearly defining expectations and proactively rewarding compliance.
- Create a sustainable safety culture by defining your own safety metrics, communicating those with employees and tracking the results.
